

Measurement lances

Measuring lances of FERROTRON Technologies GmbH are delivered ready-to-use. We distinguish between measuring lances for combined oxygen and temperature measurement and lances for temperature only measurement.

The handheld measuring lances consist of measurement tip, extension tube, handle with 3/4" screw socket and 6 pole Harting connection.

The measuring tip consists of contact block, measurement tube and compensation cable. It is produced according to the length and type of the probes and thermocouples. The total length depends on the customer's needs and specific application.

FOX[™] handheld measurement lances for combined oxygen and temperature measurement are available as follows:

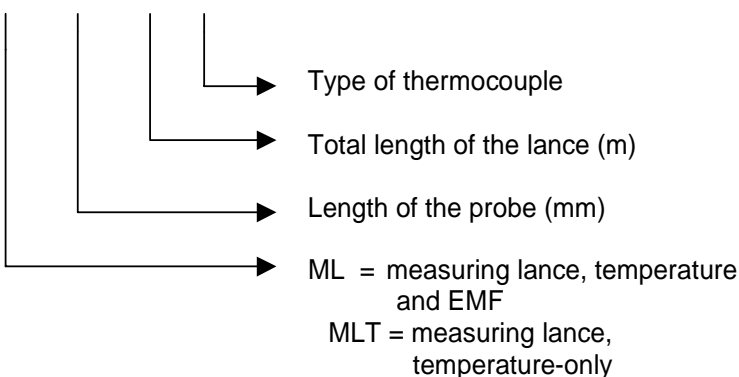

Standard length ML 1200/3,5 Type: S
for example: ML 1200/3,5 Type: B
For temperature-only measurement Standard
length MLT 1200/3,5 Type: S
for example: MLT 1200/3,5 Type: B

All lances are delivered straight. All pieces are available as spare parts.

All measuring tips for automatic measuring lances are delivered at customer request.

The type declaration of the measuring lances are as follows:

ML 1200 / 3,5 Pt10 Rh-Pt
